

FACULTY OF ARTS & SCIENCE
Teaching Assistant – CUPE 3902, Unit 1
September 1, 2022 - December 31, 2022

STA313H1F- L0201, Data Visualization

An introduction to data visualization and the use of visual and interactive representations of data to support human cognition. This course covers visualization techniques and algorithms based on principles from graphic design, perceptual psychology, cognitive science, and human-computer interaction. Topics include: graphic design, interaction, perception and cognition, communication, and ethics. Computational tutorials involve design review, implementation, and testing of information visualizations.

Qualifications

Solid knowledge of R and R Studio programming, good understanding of visualization and research methods in Human-Computer interaction. Thorough familiarity with all topics covered in the course including perception, graphics design, visualization principles, and user research. Enthusiasm for teaching beginners and ability to handle interactive (problem solving) tutorials and labs. These paid positions are open only to University of Toronto Students who have demonstrated a sound knowledge of the relevant subject matter and who have the ability to impart that knowledge to other students. Candidates must have an academic background in Statistical Sciences and/or Computer Science. PhD student in actuarial science, statistics, biostatistics, or computer science. Preference will be given to candidates who successfully completed a visualization (STA2555/CSC2537), and/or Human-Computer Interaction (CSC318) course, or professional experience in the relevant subject matter.

Duties

It is expected that you will be required to attend virtual tutorials and office hours 1-2 times/week possibly on different days. General duties include conducting weekly tutorial sessions; holding office hours; grading homework, quizzes, tests, assignments & exams; other duties as required by the course.
