STA130H1S L0201 - An Introduction to Statistical Reasoning and Data Science
This course, intended for students considering a program in Statistical Sciences, discusses the crucial role played by statistical reasoning in solving challenging problems from natural science, social science, technology, health care, and public policy, using a combination of logical thinking, mathematics, computer simulation, and oral and written discussion and analysis.

Qualifications
- Strong communication skills and ability to communicate statistical concepts to beginner statistics students
- Experienced in using R, R-studio to produce plots, data summaries, and perform basic statistical tests
- Experience in interpreting statistical results in plain English

Relevant Criterion
Previous experience is the more relevant criterion than the need to acquire experience in respect of this posted position.

Duties
Duties are in person unless otherwise indicated and will include any or all of the following:

Preparation for classes, preparation of written or audio-visual materials, designing and maintaining course websites, attending lectures, running tutorial sessions, facilitating and evaluating student engagement on online discussion boards, participating in training sessions, meeting with the instructors, teaching, leading discussions, and supervising laboratories, rating students’ work, holding office hours, consulting with students (including electronic consultation), writing and grading tests, examinations and lab sets, grading essays and term papers, invigilating midterm and final exams, setting up experiments, conducting field trips, and conferring with the supervisor in charge, as required by the employee’s teaching duties.

Duties of this position shall be performed on the St. George Campus.

Instructor: Nathalie Moon
