

Syllabus for PMU197: Thinking better with Statistics

Radu V. Craiu

September, 2023

Description:

We explore the impact Statistics has made and continues to make on everyday life through science, law, and the modern methods for information processing. Statistical principles will be illustrated using examples from real life including business, romance and health.

Marking:

- 30% of the mark is based on class participation.
- 30% of the mark is based on 2 in-class quizzes.
- 40% of the mark is based on running and analyzing experiments.

Reading:

We will use a number of articles from newspapers, internet, scientific journals to discuss and analyze statistical ideas for every day life. In addition, we will use the following two books:

- “Seeing through Statistics” by Jessica Utts
- “Struck by Lightning” by Jeffrey Rosenthal
